Supervisor's Name: Rohit Raj Pandey

Final Project Individual Aim & Objectives

Title of my Project: Improve presentation and public speaking skills by analyzing speech

Aim of my Project:

The main aim of the project is to create an android application for those who wants to improve their public speaking and presentation skills by helping the people to build their confident while delivering speech. Similarly, this application will look for breathing, repetition of words and pausing. So, this application can have a great influence on what the speaker is trying to express and allows the listener to focus on the message itself.

Objectives of my Project:

- Assisting the person in developing Vocabulary and Fluency
- Checking and balancing the pauses or breathing stops
- Pronunciation checker will ensure that all words are pronounced correctly
- Providing an opportunity to learn how to be a good listener
- There will be some notes or distinctive lines to attract the audience at the start of any topic or at the finish of any contents or presentations
- Given recent top news to engage audience in conversation so that they are not bored
- To meet public demands or needs, we must improve our capabilities
- While checking punctuality it adds some recent words and phrases
